NIOSH LODD
FIREFIGHTERS ARE DYING

YOUR PROBLEM
☐ Lack of effective communication
☐ Lack of effective accountability

OUR SOLUTION
☑ Effective communication on a dedicated wireless radio system
☑ Know immediately who is calling MAYDAY

Is YOUR Accountability Up To PAR?

In-Command® Emergency Signaling & Automated Accountability gives Incident Command the ability to perform PAR CALL · ROLL CALL · EVAC with acknowledgment from the firefighter.

Try that with a traditional key tag system!
